

Modern vs. Legacy Software: 10 Reasons to Upgrade Now

You could just spend another year on your Sage construction software. After all, you’ve paid for it, implemented it, and everyone across your teams is familiar with it.

But think of all the ways Sage could be holding you back from growing your business. Legacy systems are hard for new employees to learn. They’re designed for desktop computers, which means your mobile teams will have to log onto multiple apps just to complete routine tasks. They don’t connect well with your other construction software like Procore.

Have you considered upgrading to a modern construction platform?

Here are 10 ways in which Acumatica Construction Edition—a cloud-based solution—delivers greater value than the typical legacy system.

ACUMATICA
CONSTRUCTION
EDITION
SAGE

	FEATURE	BENEFIT		
1	Intuitive	Easy to learn and use. Connects everyone across your organization with the same information, which encourages collaboration and improves accuracy.	+	-
2	Universal Accessibility	Lets you access the system from any device, anytime, anywhere. Supports staff who are working in the field or at customer or supplier sites.	+	-
3	Customer and Service Management	Displays real-time data on all customer activities, including customer contacts, quotes, orders, invoices, payments, support cases, and service calls.	+	-
4	Role-Based Dashboard	Delivers real-time visibility into the state of your business by construction role—to the right stakeholders at the right time. A self-service dashboard, with drill-down into details, provides comprehensive insights into business performance.	+	-
5	Adaptable Workflows	Automates, controls, and streamlines accounting and back-office construction processes to reduce the burden for accounting, operations, and front-office staff throughout your organization.	+	-
6	Unlimited Users	Lets employees access the information they need without requiring additional user licenses.	+	-
7	Extensive Integrations	Integrates with leading applications such as Procore, ProEst, and DocuSign.	+	-
8	Low Total Cost of Ownership (TCO)	Reduces the total cost of ownership over the foreseeable lifetime of the product (at least 3-5 years), including licensing.	+	-
9	Software Enhancements	Enhances the current software based on customer needs, and develops and adopts new technologies to further streamline customer operations.	+	-
10	Free Training	Experience free online training and built-in User Guide for self-paced learning.	+	-

See Acumatica Construction Edition in Action

Your legacy software has gotten you this far. But if your company is ready for a new level of profitable growth, it's time to transition to a cloud software solution that can support you all the way. Acumatica Construction Edition is full-featured construction accounting software that helps you connect your field and office teams, improve margins and streamline your most time-intensive processes.
